---

## PROFESSIONAL SUMMARY

Results-driven React Native Developer with 4+ years of hands-on experience building high-performance cross-platform mobile applications for iOS and Android. Proficient in JavaScript, TypeScript, Redux, REST APIs, Firebase, and Push Notifications. Proven track record of delivering production apps through complete SDLC — from requirements gathering and prototyping to App Store and Google Play Store deployment. Adept at working in Agile/Scrum environments and collaborating with cross-functional teams to meet client expectations.

## TECHNICAL SKILLS

**Mobile Development:** React Native, Cross-Platform App Development (iOS & Android), Hybrid App Development, Expo

**Languages:** JavaScript (ES6+), TypeScript

**UI & Animations:** Styled Components, React Reanimated, Deep Linking, React Navigation

**State Management:** Redux, Context API

**Backend & APIs:** REST APIs, Axios, WebSockets, Socket.io, Firebase (Realtime DB, Auth, Cloud Messaging)

**Payments & Auth:** Stripe Payment Gateway, OAuth 2.0, Social Login (Google, Apple)

**Tools & Platforms:** Git, GitHub, Google Maps SDK, Push Notifications (FCM/APNs)

**Deployment:** App Store (iOS) Submission & Deployment, Google Play Store (Android) Submission & Deployment

**Methodologies:** Agile, Scrum, SDLC, Prototype-Driven Development

## PROFESSIONAL EXPERIENCE

---

### Senior Software Engineer - React Native

Webskitters Technology Solutions Pvt. Ltd.

August 2021 – Present

Kolkata, West Bengal, India

- Engineered cross-platform mobile applications using React Native (iOS & Android) across diverse domains, including Lifestyle & Wellness, E-commerce, Outdoor & Adventure, Social Community, and Enterprise B2B, delivering consistent, high-performance user experiences.
- Architected scalable state management solutions using Redux and Context API, reducing UI inconsistency and improving app responsiveness for complex, data-heavy screens.
- Built smooth, gesture-driven UI experiences using React Reanimated and Styled Components/NativeWind, significantly elevating perceived app quality and user engagement.
- Integrated Stripe Payment Gateway for secure in-app purchases and subscriptions, and implemented OAuth 2.0 / Social Login (Google, Apple) to streamline user onboarding.
- Implemented real-time features using WebSockets and Socket.io for live chat, notifications, and dynamic data feeds in social and community-focused applications.

- Configured and managed Push Notifications via Firebase Cloud Messaging (FCM) and APNs, driving user re-engagement across iOS and Android platforms.
- Set up Deep Linking and React Navigation to support complex multi-screen navigation flows and marketing campaign landing experiences.
- Owned end-to-end App Store (iOS) and Google Play Store (Android) deployment — including provisioning profiles, signing certificates, versioning, and release management.
- Partnered directly with clients across requirement gathering, prototyping, and iterative development cycles in Agile/Scrum environments, ensuring on-time delivery within scope.

## KEY PROJECTS

---

### **The Alignment Code™ App** | [thealignmentcode.store](https://thealignmentcode.store)

- Built a Lifestyle & Wellness cross-platform app using React Native, integrating Firebase Auth, OAuth Social Login, and Push Notifications to deliver a personalized user experience on both iOS and Android.
- Implemented smooth UI animations using React Reanimated and managed in-app navigation flows with React Navigation and Deep Linking.
- Handled full App Store and Google Play Store submission including certificates, provisioning, and release versioning.

### **Luminate+ App** | [luminateplus.com](https://luminateplus.com) | Legal Education & CLE

- Developed and maintained a comprehensive legal education platform using React Native, integrating Stripe for subscriptions and complex CLE (Continuing Legal Education) tracking systems.
- Implemented advanced user authentication flows including SSO integration, social logins, and secure token handling.
- Managed end-to-end SDLC, including multi-platform deployment (iOS/Android), performance optimization, and bug resolution for enterprise features.

### **AP Verses** | [apverses.com](https://apverses.com) | Literary Platform

- Developed and maintained a cross-platform literary application for Tamil novels, integrating personalized reading tools including adjustable font sizes, background colors, and night mode.
- Implemented interactive community features such as user reviews, discussion forums, and streamlined contest submission workflows for emerging authors.
- Integrated in-app subscription logic and optimized performance to ensure a seamless reading experience across both Android and iOS platforms.

## EDUCATION

---

### **Bachelor of Technology – Computer Science & Engineering**

2020

Camellia Institute of Technology, Kolkata, West Bengal, India

### **Diploma in Technology – Computer Science & Technology**

2017

Contai Polytechnic, Contai, Purba Medinipur, West Bengal, India

## LANGUAGES
